## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 43 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 43 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests an image sensor or camera having a row select signal generating circuitry configured to generate a set of row select signals to substantially simultaneously select a corresponding set of plural particular rows and each of active pixel sensors in the selected corresponding set of plural particular rows substantially simultaneously provides the buffered voltage sensor signal for that active pixel sensor to a column line such that a output node of each column line indicates a collective output signal for the active pixel sensors as independent claims 1 and 30.

None of the prior art teaches or suggest an image sensor having a row select signal generating circuitry configured to generate a set of row select signals to select a corresponding set of plural particular rows such each active pixel sensor in the selected corresponding set of particular rows provides a buffered voltage sensor signal and a column select signal generating circuitry configured to generate a set of column select signals to substantially simultaneously select a corresponding set of plural particular columns such that the a column node for each column in the selected corresponding set of plural particular column is substantially simultaneously coupled to an output node of the image sensor as claimed in independent claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
